

How to Change Your Password

You can change your password from a web browser on any device by using our **Single Sign-On (SSO) portal**:

newburyport-k12.okta.com

After clicking the link above, you will be brought to our SSO login page.

Please sign in with your **username** (not your full email) and **current password**.

After signing in, you will see our SSO portal.

On the right side of the top navigation bar, you will see your **name** next to an icon of a person. Click on your **name**, and then click on the '**Settings**' option in the drop-down list.

The option to change your password is in the **Change Password** section.

Enter your **current password first**, then the **new password** you've chosen beneath it, and finally your **new password** again to confirm. Then click '**Change Password**'.

If you entered your current password correctly, and the new password matches, you will see a temporary green check-mark that says '**Password changed successfully**'.

There's one final step to complete your password change: sign out and then sign in with your new password.

Click on your **name** in the navigation bar again and click '**Sign Out**'

You'll now be back on the SSO sign-in page. Sign in using your **username** and the **new password** you just created.

Your new password will now be updated for Google, any Chromebook, and all district computers and devices.
